FRONT-END ◦ UX ◦ UI ◦ DESIGN

## WORK EXPERIENCE

**COMPANY:** WEBScript DESIGNS  
**POSITION:** FRONT-END DEVELOPER  
**DURATION:** AUG 2023 - PRESENT

Webscript Designs is a full service marketing solutions agency based in Tunbridge Wells. I am part of a small team of developers working on web applications. I've worked on a couple of projects. Influxer; a portal for connecting brands with social media influencers and Easybook Training; a UK-based training provider that offers a range of professional training courses to individuals and companies.

### MAJOR ACCOMPLISHMENTS

- Defined front-end tech stack for complete redevelopment of Easybook Training, which includes VueJS, Typescript, custom CSS and Tailwind.
- Solely responsible for all front-end development including building over 20 custom pages with logic and a huge range of custom Vue components.
- Further developed my understanding on Typescript.

**COMPANY:** HOLOGRAPH  
**POSITION:** FRONT-END DEVELOPER AND DESIGNER  
**DURATION:** OCT 2019 - JULY 2023

At Holograph, a renowned software development agency, I served as the key liaison between the front-end and development teams, using my unique blend of design and development skills to deliver an array of successful projects.

### KEY RESPONSIBILITIES

- Designed, developed, and refined our core suite of applications, including our Content Management System (CMS), Page Editor, Customer Relationship Management (CRM) software, E-commerce platform, Form Builder, and Face Tracking Point of Sale Screens.
- Collaborated closely with both the front-end and development teams, integrating design and development aspects to ensure seamless project delivery.
- Regularly worked on client projects for major brands, including **Lucozade**, **Ribena**, **One Suntory**, and **Roald Dahl**, meeting unique client needs and exceeding expectations.
- Played a critical role in the company's successful pivot towards QR code instant win competitions. Developed key campaigns, including a notable project for **Listerine** and **Xbox**.

### MAJOR ACCOMPLISHMENTS

- Transformed our site's core CSS into an SCSS framework, resulting in improved design consistency and easier maintenance.
- Led the design and development of our core internal applications, particularly the Content Manager, enhancing user experience and efficiency.
- Conceptualized and created prototypes, design guidelines, and visuals for internal software, contributing to the overall aesthetic and usability of our applications.
- Drove the successful completion of numerous client projects, applying my diverse skills to meet complex requirements and deliver high-quality results.

## PROFILE

I like to create functional, elegant, creative pages and experiences for the web.

I am on the lookout for that stand out role that will enable me to work on exciting new projects and drive my personal growth and performance.

## SKILLS

### HTML

Semantics  
Accessibility  
SEO  
SVG
